Project Design Phase-II
Data Flow Diagram & User Stories

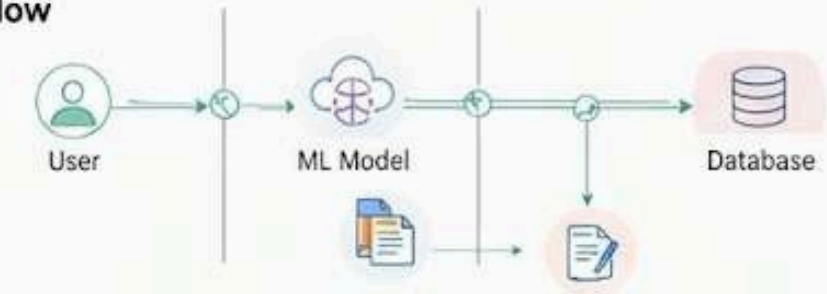
Date	31 January 2025
Team ID	Team 230
Project Name	Insurance Fraud Detection Using Machine Learning
Maximum Marks	4 Marks

Data Flow Diagrams:

A **Data Flow Diagram** (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

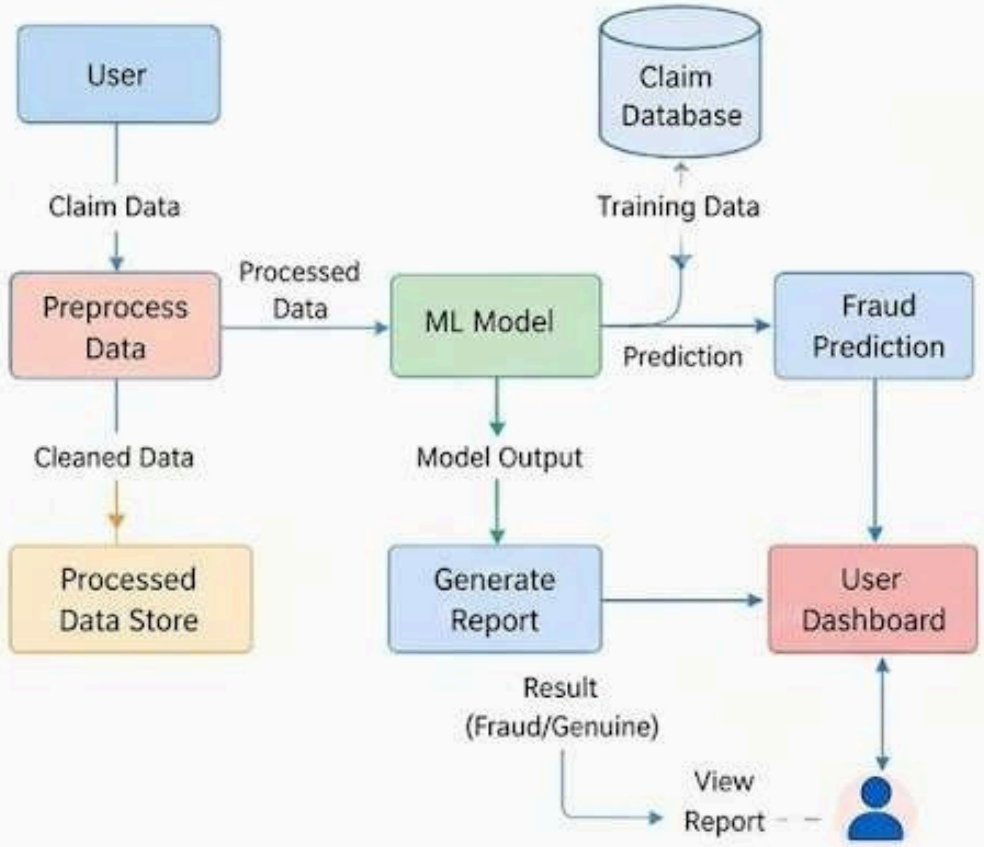
Example: (Simplified)

Flow



1. User uploads insurance claim data and provides details.
2. Data is proprocessed and fed into ML Model.
3. Model analyzes and predicts whether the claim is Fraud or Genuine.
4. Resolt is stored in the database.
5. Report is generated and displayed to the user.

Example: **DFD Level 0** (Insurance Fraud Detection System)



User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Investigator	First Info Gathering	USN-1	As an investigator, I can collect initial information about a new insurance claim.	I can view initial claim info	High	Sprint-1
Investigator	Investigate Fraud Claim	USN-2	As an investigator, I can analyze flagged claims using machine learning predictions.	I can view fraud scores / flags for claims	High	Sprint-1
Claims Adjudicator	Review Claim Details	USN-3	As a claims adjudicator, I can review the claim details and risk analysis report	I can evaluate the validity of the claim	High	Sprint-1
Claims Adjudicator	Validate Suspicious Claim	USN-4	As a claims adjudicator, I can request further investigation if a claim is suspicious	I can flag suspicious claims for investigation	Medium	Sprint-2
Claims Adjudicator	Approve/Reject Claim	USN-5	As a claims adjudicator, I can approve or reject a claim based on the fraud assessment score.	I can approve/reject claims	High	Sprint-2
Risk Analyst	View Insights / Reports	USN-6	As a risk analyst, I can access reports showing fraud patterns and high-risk areas.	I can view fraud detection reports	High	Sprint-3
